

ICT within the curriculum in the Fort Federation:

In our rural schools we ensure that ICT is linked in with a variety of subjects across the curriculum. These deep links run through maths, science and design and technology, amongst others. These opportunities ensure that children are able to use technology in a variety of ways and we have computers stationed in each of the classrooms to provide a safe and secure environment in which to work. In KS1 we begin by introducing simple programs and algorithms and teaching the children to use the internet safely and effectively. This is furthered in KS2 where children can learn to write and debug simple programs and recognise acceptable and unacceptable behaviour when using a variety of software.
